Project Proposals (BCS-4B)

Field	Instructions	Example	Group Submissions				
Group Number	*Leave blank (auto-assigned)*	0	1	2	3	4	5
Project Title	*Short descriptive title*	Library Management System	QueryForce	Event Management System	CareFlow	Smart Parking System	SmartCart – E-commerce Management System
GitHub Repository URL	*Create a GitHub Repository, upload your source code to it, paste its URL here*	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
Group Members	*List each team member's full name (maximum 3)*	Alice Johnson Bob Smith Charlie Lee	[illegible] [illegible]	[illegible] [illegible]	[illegible] [illegible] [illegible]	[illegible] [illegible] [illegible]	[illegible] [illegible] [illegible]
Roll Numbers	*Mention each member's roll number in proper format*	[illegible] [illegible] [illegible]	[illegible] [illegible]	[illegible] [illegible]	[illegible] [illegible] [illegible]	[illegible] [illegible] [illegible]	[illegible] [illegible] [illegible]
Project Description	*Brief description of the system and its purpose (3–5 sentences)*	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
Target Users	*Who will use this system? (maximum 3)*	Librarians Faculty Students	SaaS Users CRM User ERP System	Event Organizers (Admins) Event Attendees	Care Coordinators Doctors Admins	Parking Staff Manager Vehicle Owner	Customers Store Admin Product Management
Key Features	*Main functionalities (minimum 5)*	Add/update/delete books Register and manage members Issue and return books Search books by title/author/category Track overdue books and fines	Advanced Query Optimization Data Visualization Integration AI/ML-based SQL Assistant	Event Scheduling Real-time Booking Inventory Control User Authentication Transaction Tracking	Trend-Based Risk Scoring Automated Action Proposals Automated Scheduling & Assignment Human-in-the-Loop Workflow Audit Logging	[illegible] [illegible] Parking Slot Management Data Integrity and Record Keeping Admin Dashboard	User Management Order Management Store Analytics Stock Management
Selected RDBMS	*Choose any one relational database from the dropdown list*	PostgreSQL	PostgreSQL	[illegible]	MySQL	[illegible]	MySQL
Tools / Tech Stack	*List of tools / technologies to be used*	Node.js Express React [illegible] Tailwind CSS	[illegible] Python JavaScript React Tailwind CSS	Node.js Express.js [illegible] [illegible] JavaScript	FastAPI Python React Tailwind CSS Synthetic FHIR Datasets	HTML CSS JavaScript Python Node.js	HTML CSS JavaScript
Project Complexity	*Self-assessed difficulty*	Medium	High	Medium	High	Medium	[illegible]
Instructor Comments	*Leave blank (for instructor)*	[illegible]					
Instructor Approval Status (Yes / No)	*Leave blank (for instructor)*	Yes
